Baja California, Mexico · LinkedIn · GitHub · Portafolio · +52 646 236 2914 · andan.devp@gmail.com

Full-stack developer specialized in frontend development, capable of building user interfaces and backend services, with 1 year building production web platforms in React/NestJS, open to remote junior roles

EDUCATION

Universidad Autónoma de Baja California — ***Ensenada, Baja California***

Software Engineering and Emerging Technologies — *August 2022 - June 2026*

Graduated: June 2026

Certification in progress (expected November 2026)

PROFESSIONAL EXPERIENCE

Software Development Department at UABC — **Ensenada, Baja California**

Full-Stack Developer — *August 2025 - May 2026*

- Conducted the analysis and design of a ticket management system for work tracking within the department.
- Designed the database infrastructure.
- Designed the website using the university's institutional colors and UX principles.
- Developed the frontend of the application, ensuring responsiveness across multiple devices.
- Developed the backend of the application to handle database operations and communication with the frontend.
- Used technologies and tools such as React + Vite, NestJS, Prisma, Figma, and Keycloak.

CAF Ensenada — **Ensenada, Baja California**

Frontend Developer — *May 2026 - September 2026*

- Developed a website supporting children with developmental disorders, translating Figma designs into functional code.
- Implemented the design using React + TypeScript with Next.js, ensuring visual accuracy and responsiveness.
- Coordinated weekly progress updates with my direct supervisor to align priorities and proactively resolve blockers.
- Proposed UX/UI improvements that were incorporated into the final design.
- Delivered the assigned module within the established timeline, meeting monthly objectives.

Academic Projects

Cibershield — **Ensenada, Baja California**

Frontend Developer + UI/UX Designer — March 2026 - June 2026

- Completely redesigned the interface in Figma, modernizing the user experience of an educational platform focused on phishing detection.
- Implemented the design using React and Tailwind CSS.
- Repository: Cibershield Github
- Page: Cibershield

EXTRACURRICULAR

Hackathon Talent Land 2025 — **Guadalajara Jalisco**

Frontend Developer — *April - 2025*

- Collaborated in the development of an online food ordering application for McDonald's, focused on improving the existing user experience as part of a challenge track.
- Developed the application using Expo with React Native and Tailwind CSS.
- Figma: Design

Hackathon NASA Space Apps Challenge — **Ensenada, Baja California**

Frontend Developer + UI/UX Designer *October - 2025*

- Designed the mobile application using a modern and minimalist approach to create a clean and intuitive user experience.
- Used Figma to prototype and preview the application design.
- Developed the frontend of the application using Expo with React Native.
- Figma : Design
